Shockwave therapy is a highly effective, non-surgical treatment for chronic tendon related pain, and a real alternative to surgery.

GAIN FAST PAIN RELIEF FROM CONDITIONS INCLUDING:

- ✓ Tennis & golfers elbow
- ✓ Shoulder pain
- ✓ Chronic muscle pain and injury
- ✓ Chronic Heel pain (bottom or back of the heel)
- ✓ Achilles trauma
- ✓ Tendonitis
- ✓ Hip pain
- ✓ Shin Splints
- ✓ Sports Injuries

During this highly effective and non-invasive treatment a probe is pressed on to the affected area and the shockwaves are delivered through the skin. The shockwaves break down injured tissue and calcifications.

"We believe this highly effective treatment should be available to more and more people. We are proud to be one of the first clinics in not only Devon, but the UK to be able to offer this treatment at a very affordable price."
